

Facebook Ads Case Study for Business Funding Service

Industry: Business Funding / MCA (Merchant Cash Advance)

Objective: Generate highly qualified leads for funding amounts of \$10K-\$2MM through Facebook Ads.

They needed a lead generation system that would:

- Pre-qualify leads automatically.
- Integrate directly with their CRM.
- Optimize campaign performance using Meta’s Conversions API.

My Strategy

I designed a **full-funnel Facebook Ads ecosystem**, backed by conversion-focused funnel architecture and real-time CRM integration.

Step 1: High-Converting Landing Page

- **Value-driven headline:** “Find out how much you can borrow in just 5 minutes.”
- **Urgency + Trust triggers:** Same-day funding, quick approvals, SSL secured, Trustpilot & BBB logos.
- **Call to Action:** “Find Out How Much I Can Borrow” (results in high engagement).

Find out how much you can borrow in just 5 minutes

Speak with an experienced funding specialist and discover how you can access \$10K – \$2MM in 24 hours or less.

- ✓ Quick Application
- ✓ Approvals within a few hours
- ✓ Same day funding

Find Out How Much I Can Borrow

Our customers say
Excellent

4.5 out of 5

Build a high-converting landing page based on intensive market research. The goal was to generate highly qualified leads.

Step 2: Conditional Survey Funnel

- Built a multi-step form that:
 - **Automatically disqualifies** applicants requesting <\$10K (e.g., \$500–\$9,000).
 - Shows the next questions only if the previous ones meet eligibility.
 - Improves Facebook algorithm learning by filtering poor-quality data early.

How Much Money Do You Need?

*

\$500 – \$9,000

\$10,000 – \$25,000

\$25,000 – \$50,000

\$50,000 – \$100,000

\$100,000 – \$250,000

\$250,000+

Step 3: Pixel & Conversion API Setup for Tracking

- Connected Facebook Pixel with GoHighLevel CRM.
- Enabled server-side event tracking (CAPI) for improved attribution accuracy.
- Synced offline events (lead-to-customer conversions) for long-term optimization.

Connected CRM with the Meta ads to import the offline conversions (actual customers) so we can optimize the ads better.

Step 4: Ad Creative Testing

- Launched multiple ad creatives focused on emotional pain points:
 - “The banks said no, we said yes.”
 - “Get funded in 24 hours. No red tape.”
 - “You’re doing over \$50K/month but can’t get funding?”
- Used contrast bias and belief reversal strategies to increase relevance and CTR.
- Created enough variations to train the algorithm faster.

What Made It Work?

- **Pre-Qualification Logic:** Reduced bad leads before they entered the system.
- **Meta + CRM CAPI Sync:** Allowed Facebook to learn from real buyers, not just leads.
- **Messaging Match:** Creative, funnel, and ad copy were aligned to funding pain points.

- **Real Testing Strategy:** 10+ ad variants gave Facebook enough data to find winners quickly.

Services Used:

- Landing Page Design
- Funnel Build with Conditional Logic
- Facebook Ads Creative + Strategy
- GoHighLevel CRM Integration
- Conversions API Setup & Attribution Tracking
- Full Ad Account Optimization
